CLASS NEWS CLASS NEWS -

Thank you to all the parents that attended the Christingle Service on Thursday. Unicorns have enjoyed learning about and making their Christingles in class.

This Week's Learning

During our Science lessons we have been conducting a variety of investigations. We have been using a newton measure to test the amount of force different objects give. We made a lot of predictions and tried to estimate the correct amount. We also set up an experiment to help us to learn about friction. For this, we had to make sure it was a fair test. We decided to use a car and a variety of ramps to see which material slowed the vehicle down by creating friction. The wooden surface had the least amount of friction. The unicorns gave some scientific explanations for their results.

ROLL OF HONOUR

Learner of the Week Iris Prince

For - learning new art skills and improving her drawing.

Well done Millie for moving up to gold!

Building Learning Power award goes to Ellie Shaw for keeping focussed on her learning and managing her distractions.

DATES FOR YOUR DIARY

25th November - Non uniform (please bring items for the PTA hamper raffle).

9th December - Panto trip

12th December - Junior Carol Service (including year 2 children in Unicorns).

15th December - Unicorns Christmas lunch
