

## Instructions to play matching pairs

Cut out all the matching pairs cards.

Place them all face down on the floor or table (it can sometimes help to place them in the shape of a square or rectangle).

Each player takes it in turns to turn over 2 cards. If the cards have an addition and answer that match, the player keeps the pair and has another go. If the cards do not match, the player must put them back in the same place and the next player has their go.

The game continues until all the pairs have been found.

The winner is the player who has the most matching pairs at the end.
