

Oaks Home learning - Week commencing 18th May 2020

Hi Oaks.

This will be your last home learning grid before the half term break so I have added a few extra ideas to keep you busy during the week. Remember to check all your online learning platforms (Purple Mash, TT Rockstars and Spelling Shed) for the different activities that have been set.

This week in **English** the theme is Climate Change. The Lancashire planning unit has some great ideas for reading and writing to inspire you. But if you are looking for other inspiration for writing, I have attached some extra ideas for you to have a go with. Grammar activities have also been set on Purple Mash.

Maths - new activities have been set on Purple Mash for you to try. These are all revision of topics that we have covered in class. Make sure you are still logging into TT Rockstars daily to improve that rock speed score. For those of you who like a puzzle, why not have a go at the weekly maths problem?

Reading - What has been the best book -fiction or non-fiction- that you have read whilst you have been at home? Send me your suggestions and your reasons why (You could do this through Purple Mash or school email). It would be great to compile a reading list of books that inspire our future Year 6s.

Thank you for your photos showing me what you have been up to when learning about our topic of Water, Water everywhere and your VE Day activities! I am so proud of the amazing work that has been completed. Remember you are not expected to complete all of them as these are just suggestions. Please adapt the ideas to suit you. I have attached some ideas for activities with this overview.

Finally this week, the school has been invited to take part in Rossendale's Virtual Mile to keep us all active. Why not have fun with all your family and see if you can beat your best time when completing a mile? The primary school with the most entries will be crowned the winners with prizes given to the top 3 runners in each age category. There are some great route suggestions on the attached invitation from Mr Bibby.

Enjoy your week

Mrs Lee

Create!

Create a 2D or 3D version of the water cycle.

Does your work show all the different parts of the water cycle?

Create!

Paint/Draw a landscape that has a water source in it. A river, the seaside, a waterfall. Think about how you will achieve the correct perspective.

Research!

Our topic is Water, Water Everywhere! Find out as much information as possible about one of the major rivers in the world eg The Nile, The Amazon, The Mississippi, and The Yangtze

What facts can you find out about it?

- What countries does it run through?
 - How long is it?
- How is it used to support the land around it?
- What are the different features of the river?

Present your information as an information booklet.

Challenge: Can you rank all the rivers of the world in order of their length?

Home related tasks

Make sure you help around the house each day - keeping your room tidy, hoovering up, emptying the bins are just some of the jobs you can do.

Sort out any of your old toys or clothes that can be donated to charity shops once they have reopened.

Plan and cook a meal for the family once a week. Use the internet to google different recipes.

Set yourself a new challenge - learn a new skill or complete that puzzle that you have been putting off.

Stay in contact with family or friends - Facetime, Skype or email them. They would love to hear from you!

Quiz!

Can you complete the rivers table by using the internet to find the missing information?

Or why not create your own quiz all about the rivers of the world?
